

***Blazons of Sinnocks and Antecedent Families, by Scott Sinnock, 1994 - 2014, derived record  
(see also Coats-of-Arms)***

This record is a list of heraldry blazons or descriptions for various families counted among the ancestors of Sinnocks. Blazons are descriptions of family coats-of-arms written in archaic heraldic language. Most family blazons were copied from *Burke's General Armory* of 1887 though some, as indicated, were obtained from other publications, some from family records, and some as proposals by Sinnock family members. Several alternative entries for several families are included. Other Sinnock ancestral families with registered blazons may occur, especially late medieval families like Valletort and Paulet. However, this collection focuses on those families that were living after public records began in the 1500's.

***Blazons of the Sinnock Family and other Families with Sinnock Descendants***
